ATOMIC **PRO** **CENTER**

THE **ULTIMATE** **SHOP FOR** **RACERS**

ATOMIC PRO CENTERS

Atomic Pro Centers are our competence centers created exclusively for FIS members and race enthusiasts, from junior racers to World Cup competitors. You'll quickly discover it's not just the gear that makes these places special. Our experienced alpine race technicians will work with you to find the perfect ski set-up.

Our main Atomic Pro Center is located at the Atomic global headquarters in Altenmarkt, on the same site as our ski production and R&D facilities. There is also an Atomic Pro Center at SNØ in Oslo, at Equipion in Moscow and 30 Atomic Pro Center Partners worldwide.

RACING SERVICES

Experts with World Cup experience will share our top-end racing equipment with you and build your own individual set-up. It enables racers on the way up to experience the unique service enjoyed by our top Atomic stars – from having their skis tuned in our Race Department with Wintersteiger equipment to having their boots professionally fitted by our Atomic race technicians.

First Class
WINTERSTEIGER
 Ski & Board Tuning

APPOINTMENT

Racing services are available in Altenmarkt and Oslo, and any of our Pro Center partners in your region. To make sure we have enough time for individual service, please book an appointment in advance.

Please find our Atomic Pro Center and Pro Center Partners listed on the back page of the catalog.

BORN ON THE RACE COURSE.

Redster features the same technology used by the world's top skiers to give you maximum performance on the piste. Inspired by more than 60 years of Atomic innovation and fueled by record-setting World Cup wins, Redster represents the pinnacle of alpine skiing equipment. From our work with Marcel Hirscher — an athlete renowned for his unwavering approach to perfection — we've reinvented every element of the Redster collection for the tightest lines and fastest times. The result? A race-proven range of skis, boots, and helmets that allows skiers everywhere to push their personal boundaries and break new ground.

REDSTER TECHNOLOGY

CONSTRUCTION

TOPSHEET

Revoshock: Redster Revoshock turns unwanted shocks into confidence-building stability and unparalleled acceleration. **Structured topsheet:** A structured topsheet massively increases durability and gives a high quality finish.

LAMINATE

Titanium Powered: A titanium layer above and below the core creates supreme shock absorption, strong running stability and high torsional flex.

CORE

Power Woodcore: A sporty, dynamic ash and poplar woodcore that adds a ton of stability and dampens vibrations at speed.

REVOSHOCK MODULE

Utilizing a series of spring steel modules each encased in impact-absorbing elastomer, our revolutionary new Revoshock technology acts like a built-in suspension system for your skis to block distracting shocks before they reach your feet. So whether you're straight-lining groomers or making fast turns at your limit, the race-proven Redster Revoshock provides a smoother, more precise run — freeing you up to concentrate on your skiing in total confidence.

Revoshock doesn't just absorb impacts — it rebounds them. From your ski tip to the binding plate, each spring steel module works in harmony to turn wasted energy into valuable acceleration out of the turn. And because a vibration-free ski leads to a more confident skier, you'll find yourself pushing harder and faster than ever before.

Our mission is to drive the sport of skiing forward. For more than 60 years, our equipment has powered professionals and enthusiasts alike to achieve their full potential — from the top step of the World Cup podium to the first chair at the local hill. Inspired by our history and determined to push the limits of performance, we created a range of Redster and Hawx ski boots designed to provide the ultimate skiing experience that you've never had before: the Atomic Professional Series.

The innovative Professional Dual Strap combines two elements together for secure, balanced performance. Elastic shock absorbing portion smooths out choppy terrain and increases damping while static section provides pure power and energy transmission.

Customizable tongue system allows you to select the ideal tongue thickness to suit your needs. Choose between Low Volume (LV) fit, Medium Volume (MV) fit and High Volume (HV) fit for the ultimate interface between shin and liner.

REDSTER JR

REDSTER HELMET

Born on the race course.
Built to protect.

SUPREME PROTECTION AND INSTANT FIT

CARBON RACECASE

The handcrafted Carbon Racecase is supremely stiff, strong and super light. Featuring a multi-directional layup for unrivalled protection and structural stability, it's specifically designed for racing.

AMID

AMID (Atomic Multi-directional Impact Deflector) is our revolutionary dual-density foam system that provides up to 40% higher impact protection than industry safety standards require.

360° RS FIT SYSTEM

The 360° RS Fit System is height-adjustable and lets you fine-tune the helmet to your head shape and size. Customizable Live Fit pads surround the head with a soft, cushioned layer, offering an instant fit and damping shocks before they can reach the head.

SMART AND SAFE

SHOCKSENSE SENSOR

A fully integrated impact sensor for your ski helmet offers state-of-the-art technology to detect the location, force, and severity of helmet impacts and feeds the data into the Atomic Shocksense App.

IMPACT ASSESSMENT

With Atomic Shocksense there are five separate impact-detection zones on your helmet. These help to assess the location and force of an impact on the helmet more accurately and safely, and then indicate whether the helmet is still protecting the racer.

ATOMIC SHOCKSENSE APP

The sensor inside your helmet combines with the Atomic Shocksense App to measure impacts and transmit an SOS alert if needed. The app also tells you the overall status of your helmet – whether it's ok or damaged. This status is based on data from each of the impact-detection zones.

Impacts on your helmet are graded into three colors depending on severity:

- Light
- Medium (assessment required)
- High (replacement required)

SL	U14 MEN / WOMEN	>= 130 cm				50 mm
SL	U16 MEN / WOMEN	>= 130 cm				50 mm
>= minimum / <= maximum						
MASTERS						
SG	MEN	185 cm*				50 mm
SG	WOMEN	180 cm*				50 mm
GS skis are allowed!						
GS	MEN	185 cm**				50 mm
GS	WOMEN	180 cm**				50 mm
SL	MEN					50 mm
SL	WOMEN					50 mm
* no tolerance / ** – 5cm tolerance						
For masters athletes the ski length is a recommendation (except SG)! No restrictions regarding length, width and radius for women above 55 and men above 65! The FIS recommendations and rules for ski length, radius and profile width can be found in the current FIS Specifications for Competition Equipment! (www.fis-ski.com)						

REDSTER FIS USER RECOMMENDATIONS 2021

Ski selection of FIS products, both length and model, will be always very individuel and a subjective desicion. We noticed some common trends and following chart should help you to make the right descisions. The optimal skis FIS model and length is determined by the ability, the weight and also the strength of the user.

AGE	WEIGHT (kg)	WEIGHT (lbs)	SLALOM	LENGTH (cm)	BINDING	GIANT SLALOM	LENGTH (cm)	BINDING	BOOT
